# On Becoming a Security Engineer

LSST Tech Talks

Russ Allbery

Dropbox
& Debian Contributor

As a software engineer and system administrator I ran authentication and authorization systems for years and thought I understood security fairly well. Then I moved into security proper and discovered new problems, trade-offs, and ways of analyzing risk. This is a summary of what I learned, what I was surprised by, and how security engineers think.

Friday 11 am (local)
10 am (LSST project)
30th November 2018

NOAO building
950 N Cherry Ave
LSST Workroom
